ABOUT THIS REPORT

Our Annual Report provides an overview of the work of Kota Kita Foundation from January 2017-December 2017. The report covers the work of Kota Kita, organized following the urban sector focuses, details the activities and programs, and illustrates collaborations and joint work with our partners and collaborators.

All images are credited to Kota Kita except stated otherwise.
Kota Kita aims to improve urban lives by encouraging participation and collaboration, influencing urban policies, encouraging open information access, and conducting public and civic education to empower urban citizens to participate in the urban development. Since 2015, we have made commitments to improve institutional backbone of the foundation, whilst improving relevance of the activities undertaken, including addressing sectoral issues, improving innovation and technology, and consistent in our pedagogic approaches. Last year we have started to organize our activities in three big sectors umbrella of: Urban Governance and Citizenship, Urban Resilience, and Urban Inclusivity. Each sector consists of activities aligned with our vision and goals. We have also included corresponding goals and targets from the 17 Sustainable Development Goals- the world’s to-do-list to end poverty, reducing inequalities, and tackling climate change by 2030- on each activities’ achievements.

For almost a decade, Kota Kita’s work and impact have reached more than 20 cities in Indonesia: Solo, Karanganyar, Klaten, Boyolali, Sragen, Boyolali, Yogyakarta, Banjarmasin, Makassar, Bandung, Kebumen, Banda Aceh, Kupang, Pekalongan, Surabaya, Malang, Semarang, Manado, Palembang, Padang, and Jakarta. Thousands of people benefited from our program directly and indirectly; we have done collaborative works with hundreds of organizations-local, regional, national, and internationally, each we are thankful for enduring support and exchange of knowledge.
As snapshots of 2017, I am happy to announce support by local government and other stakeholders has expanded beyond Solo to Banjarmasin, South Kalimantan, supported by local government and other stakeholders. Kota Kita’s participatory methodology was successfully implemented to map and identify constraints and opportunities for disability inclusion in city planning and policy, and resulted in the development of a disability-inclusive city profile. Our action research initiative on the creative economy and the potential of informality are currently in progress and we aim to bring back this knowledge to the kampong sites to support for economic resilience. Also ongoing is our participatory design initiative in Kampong Ngampon (birdcage makers). We are consistent with our efforts to provide capacity building to young activists to encourage for more vibrant social movement in Indonesia through our Urban Citizenship Academy (now with more than 100 alumni participants in 4 cities in Indonesia). The Urban Social Forum, the fifth one last year brought together a thousand of urban activists sharing their experiences and consolidating supports for changes in our cities. We keep moving with our campaign and promotion of the Right to the City where we promote conversation around the understanding of city as “common good”, where citizens have equal rights to use, occupy, produce, govern and enjoy the city.

Finally, throughout the pages of this Report, I invite you to reflect on the range of Kota Kita’s activities, through its participatory methodology and innovation, action research and advocacy, pedagogical training and campaigning to help improve citizen participation and collective work to realize just, inclusive, and sustainable Indonesian cities. We continue to actively seek new collaborations and implement more activities to strive towards this dream.
Kota Kita aims to improve urban lives by facilitating citizen participation and collaboration, influencing urban policies, encouraging open access to information, and providing civic education to empower urban citizens to be more active, inspiring a new generation of social activists.
OUR YEAR
IN 2017, WE SUCCEEDED IN:

Strengthening our methodology in facilitating citizen participation through technology-supported, co-creation of knowledge to improve planning in Indonesian cities, also making it applicable to answer challenges in varied urban

Increasing civil society's impact by working with more partners from multiple sectors and nationalities, also from different type of institutions to generate collective ideas on what works to solve pressing urban issues and to achieve the Sustainable Development Goals

Expanding the research themes and reach, and establish more ways to use the results for impactful policy advocacy works- locally and nationally

Promoting healthy civic participation in urban and social activism through the creation of platform for exchange of knowledge and dialogues.
Kota Kita focuses on three main urban issues: Governance, Inclusivity, and Resilience.

In 2017 we grouped our activities in sectors in order to strengthen our organizational capacity and expertise in specific focus areas. Governance, Inclusivity and Resilience serve as frameworks to manage our different initiatives and achieve the organization’s ultimate vision and mission. In this way we can integrate our work across all sectors and the sustainable urban development agenda, and include the different actors and issues to reach our goals.

Urban resilience initiatives have been put on hold to 2018. This report focuses on the two Kota Kita’s focus sectors, governance and inclusivity, respectively.
2017’S URBAN GOVERNANCE INITIATIVES

BANJARMASIN KOTA KITA: CITYWIDE MAPPING FOR INCLUSIVE PLANNING & CITY DEVELOPMENT

CORRESPONDING GOALS:

10 REDUCED INEQUALITIES
11 SUSTAINABLE CITIES AND COMMUNITIES

PARTNER:
FORD FOUNDATION
We completed Banjarmasin Kota Kita, a citywide community mapping effort during the year 2016-2017. Participatory mapping creates visual and data-based materials that can serve as a reference for all stakeholders involved in public services and community projects. Specifically, the Mini Atlases or the graphic products could be used as catalyst for more detailed discussion during planning meeting, Musrenbang. The information will also be presented in digital format to be published in 2018.

As a follow-up and expansion to Solo Kota Kita, the initiative in Banjarmasin followed the same logic of implementation. We collaborated with local government, related taskforce and divisions, and citizen volunteers to collect data from the smallest administrative unit, Rukun Tetangga (RT), illustrating socio-demographic condition from demographic information, economic condition, educational attainment, to type of houses and their statuses, sanitation condition, and water and waste management. We used mixed methodology using manual survey and aerial, border mapping and technology-supported data collection and real time geo-tagging of problem and potential sites. The citywide mapping results were presented in two formats for different purposes and uses; 52 print copies of neighborhood profiles and a website called www.

“PARTICIPATORY MAPPING OF THE 52 NEIGHBORHOODS IN BANJARMASIN IS AN INITIATIVE THAT WOULD GIVE CITIZENS BETTER, CLEARER VIEW ABOUT THEIR CITY THROUGH ACTIVE PARTICIPATION. I APPRECIATE KOTA KITA’S LEAD AND INVITE TO COLLABORATE ON THIS MAPPING INITIATIVE, BECAUSE EACH VOLUNTEERS GET TO CONTRIBUTE ACCORDING TO THEIR EXPERTIZES AND INTERESTS. AT THE END OF THE PROCESS, WE ALL REALIZE THAT BANJARMASIN IS COLLECTIVELY OURS AND IT SHOULD BE LIVEABLE FOR ALL CITIZENS. THERE ARE CHALLENGES THAT COULD BE ADDRESSED AND FIXED THROUGH COLLABORATIVE WORKS OF ALL STAKEHOLDERS.”

MUHAMMAD SYAHREZA - VOLUNTEER FROM TURUN TANGAN
“Banjarmasin city welcomes collaboration. I truly appreciate the citywide community mapping that was done by Kota Kita in collaboration with the city government and civil society organization members, including youth groups. I hope that the information collected and the mini atlases will help to plan and develop Banjarmasin city to be a prosperous, inclusive, and sustainable city.”

Ibnu Sina - Mayor of Banjarmasin
Banjarmasin is a city encircled by a system of rivers, streams, and canals. Throughout the process of community mapping and data collection, we worked with volunteers who are recruited through open recruitment. The volunteers were consisted of member of Turun Tangan, students, and local citizens; they are valuable part of the initiative that gave rich local insights and knowledge to the project.

Information about 52 neighborhoods in Banjarmasin, including challenges and potentials about each neighborhoods are presented as an infographic in a printed format. They are widely known as Mini Atlases and aims to initiate conversation among citizens about their needs and advocacy for better ways to fulfill them.

The digitalization of the information aims to showcase the urban diagnostics of different cities in Indonesia to help for more targeted, fit-for-purpose planning and design of cities.

**32 Volunteers**

URBAN CITIZENSHIP ACADEMY

CORRESPONDING GOALS:

10 REDUCED INEQUALITIES

11 SUSTAINABLE CITIES AND COMMUNITIES

16 PEACE AND JUSTICE

20 GROUPS, BANDUNG & JOGJA

102 PARTICIPANTS
"URBAN CITIZENSHIP ACADEMY (UCA) ALLOWS A PLANNING STUDENT LIKE I AM TO GAIN NETWORK WITH PEOPLE I DON'T ALWAYS MEET OR BE ACQUAINTED WITH IN SCHOOL OR IN THE ACADEMIC SETTING. I THOROUGHLY ENJOYED AND BENEFITTED FROM THE SHARING OF KNOWLEDGE IN DATA ANALYSIS, MAPPING AND FIELDWORK, AND ADVOCACY; BUT IT’S THE DIVERSITY OF THE GROUP OF PARTICIPANTS AND THE FRIENDSHIP THAT follows THAT ARE MY FAVORITE FEATURE OF THE TRAINING.

INSIDE THE CLASSROOM, I LEARN THAT TO DESIGN URBAN SOLUTIONS, WE MUST LEARN FROM THE DATA AND INFORMATION AT HAND. THROUGH UCA, I PARTICIPATED IN THE PROCESS OF COLLECTING THAT DATA AND INFORMATION IN A PARTICIPATORY MANNER AND BEING IN TOUCH WITH THE CITIZENS THAT ARE MOST AFFECTED. THAT EXERCISE OPENED MY PERSPECTIVE ABOUT PARTICIPATORY PLANNING AND COMMUNITY ENGAGEMENT INTO THE PROCESS OF COLLECTIVE DESIGN FOR SOLUTIONS."

FITHROTHUL KHIMAH, STUDENT FROM UNIVERSITAS GAJAH MADA, YOGYAKARTA

The Urban Citizenship Academy program is an initiative by Kota Kita to engage a new generation of young leaders and support them in solving pressing urban problems. This program provides a platform for transmitting our approach and methodologies to youth in cities across Indonesia. Training develops their capacity to analyze problems, to understand that these problems are not inevitable, and to see that they can play an active role in addressing them to create a better future.

Urban Citizenship Academy was initiated and piloted in 2015 in Solo and it has traveled to 3 more cities to date. In 2017, the Academy engaged 20 youth groups or more than 50 individuals in Yogyakarta and Bandung.

SOME OF THE SKILLS THAT KOTA KITA SHARE THROUGH THE PROGRAM ARE:

• PARTICIPATORY DATA COLLECTION
• UNDERSTANDING THE PROBLEM: DATA ANALYSIS, PROBLEM TREE, STAKEHOLDER ANALYSIS
• TURNING DATA INTO INFORMATION: DATA VISUALIZATION AND DEFINING KEY MESSAGE
RESEARCH ON PRACTICES & IMPACTS OF PARTICIPATORY BUDGETING IN INDONESIAN CITIES

CORRESPONDING GOALS:

PARTNER:
INSTITUTE OF DEVELOPMENT STUDIES (IDS), HIVOS, MAKING ALL VOICES COUNT, KUPAS MAKASSAR, INISIATIF BANDUNG
Our research documented participatory budgeting and planning practices in six locations in Indonesia, including Solo, Yogyakarta, Makassar, Surabaya, Bandung and Municipality of Kebumen. The research observed and documented the experiences of participatory budgeting and planning – widely known as Musrenbang (or Musyawarah Perencanaan Pembangunan), and evaluated its constraints and prospects.

The lenses that Kota Kita used to determine the dynamics of participation include the adaptation to regulation, how it is implemented on the ground, levels of community engagement, access to information, innovation, budgetary proportion, and the way in which development priorities are implemented. The resulting recommendations from the research advocate for the promotion of transparent, inclusive and effective models of participatory budgeting. Since 2016-2017, this research project has been presented in many public engagements, nationally and internationally, to help mainstream the discussion about the opportunities for the practice of participatory budgeting as a way to manage public finance and impactful public service delivery.

OBJECTIVES

• To better understand participatory budgeting in Indonesian cities and identify barriers and enablers to its implementation.
• To provide recommendations to city governments and civil society organizations in order to help make participatory budgeting more transparent, inclusive and impactful.
• To promote knowledge and critical reflection about participatory budgeting throughout the country.
URBAN INCLUSIVITY
2017’S URBAN INCLUSIVITY INITIATIVES:

- Participatory Data Collection for Disability-Inclusive City Profile
- Solo’s Creative Kampongs; Promoting Informal Enterprise and Innovation for Inclusive Economic Development
- Women on Wheels
PARTICIPATORY DATA COLLECTION FOR DISABILITY-INCLUSIVE CITY PROFILE

CORRESPONDING GOALS:

PARTNER:

UNESCO OFFICE IN JAKARTA
Kota Kita and UNESCO collaborated in 2017 to deploy a participatory data collection methodology in Solo. A neighborhood-level mapping conducted by the project led to the enrichment and standardization of the participatory data collection methodology, and the development of a disability-inclusive city profile.

The initiative goes beyond mapping and identifies constraints and opportunities for disability inclusion. We worked with volunteers, who are equipped with mobile survey application to gather vital socio-economic and demographic data at the smallest administrative division level – referred to in Indonesia as “rukan tetangga” (RT). The persons with disabilities responded to a specially designed questionnaire transmit the information into a citywide dataset. We managed to mapping of various key determinants of exclusion and inclusion, such as the concentrations of persons with disabilities throughout the city and in relation to the location of various vital public institutions for education and healthcare. It produced unique datasets in being able to provide fine-grain information about the city residents with disabilities, and the degree of their inclusion in different aspects of life- to finally influence policy and more inclusive public service delivery.

**TOOLS USED:**

- **APP-BASED PARTICIPATORY DATA COLLECTION**

- **SERIES OF PUBLIC CONSULTATION**

---

“SURAKARTA IS SERIOUS ABOUT ENSURING SOCIAL INCLUSION AND ACCESSIBILITY FOR PERSONS WITH DISABILITIES. THE CITY HAS WELCOMED MANY PERSONS WITH DISABILITIES TO SEEK REHABILITATION AND OBTAIN HEALTH SERVICES, TO STUDY, AND OVERALL, TO GET BETTER LIFE QUALITY. SURAKARTA CITY GOVERNMENT COMMITS TO ENSURE THE CITY IS INCLUSIVE AND ACCESSIBLE FOR ALL, ESPECIALLY FOR PERSONS WITH DISABILITIES. IN ORDER TO REALIZE THAT VISION, THE CITY WOULD NEED COLLABORATIVE THINKING AND WORK BETWEEN THE DIFFERENT STAKEHOLDERS IN THE CITY, INCLUDING PERSONS WITH DISABILITIES.”  

FX HADI RUDYATMO, MAYOR OF SURAKARTA
The Solo City legislature had already passed the Local Law 2/2008 on Disability Rights which was hailed as breakthrough as it preceded the national ratification of UNCRPD in 2011. This regulation declared Solo as an ‘Inclusive City’ and called for citywide’s action based on ‘right-based approach to disability
The initiative has produced visual information that better illustrates the condition and challenge for the persons with disabilities in the city. They range from map of concentrations of persons with disabilities based on neighborhood, map of correlation to poverty level, access to basic public services, and access to political participation.

**HIGH LEVEL SEMINAR ON INCLUSIVE CITIES, JAKARTA, OCTOBER 31, 2017**

The High Level Seminar on Inclusive Cities, Social Inclusion, and Promotion of Rights of Persons with Disabilities: High Level Seminar on Inclusive Cities was organized by UNESCO, ILO, WHO and APEKSI (Association of Indonesian Municipalities) to showcase the results of the UN project on Promoting the Rights of Persons with Disabilities (UNPRPD) in Indonesia, and to chart the future for the Network of Mayors for Inclusive Cities. Kota Kita presented our experiences on citywide participatory mapping in Solo to and launched the two documents we created in collaboration with UNESCO, namely the Disability-Inclusive City Profile (the City of Solo) and Participatory Data Collection and Mapping Tool –aims to be a scalable model for a countrywide dissemination. We also launched the two videos that illustrate the process of inclusion, accessible here: Inclusion as a Process: Participatory Data Collection for Promoting Disability Rights in Solo, Indonesia (In English, with Indonesian Subtitles)

Inklusi sebagai Proses: Pengumpulan Data Partisipatif untuk Mendukung Hak Penyandang Disabilitas di Solo, Indonesia (Bahasa Indonesia, subtitel bahasa Inggris)
SOLO’S CREATIVE KAMPONGS: PROMOTING INFORMAL ENTERPRISE AND INNOVATION FOR INCLUSIVE ECONOMIC DEVELOPMENT

CORRESPONDING GOALS:

PARTNER:
BRITISH ACADEMY
We started this research project with support from British Academy to further examine the conditions and practices, also opportunities and challenges of informal, small-medium scale innovations contribute to economic and social sustainability. We employed a mixed methodology of direct observation, interviews, survey, and policy analysis. Furthermore, we studied the different geographical and spatial conditions of informal economy in Greater Solo, seeking to understand how Indonesian economic agglomeration and geographical concepts, like ‘kampung’ and ‘sentra interact with each other and government interventions.

VINNOVA, SWEDEN

LIVING CITIES, SWEDEN
We started the project in 2015 with a feasibility study for cycling condition in Yogyakarta and Solo, especially for women and girls. Then, we chose to concentrate our efforts in Solo City, trying out different action items, from study, public consultations, to policy advocacy, and series of campaign events.

2017 was a year of public campaigns for Women on Wheels. Equipped with studies and analysis from the previous years, last year we focused on promoting and mainstreaming bicycle as a transportation of choice for women, girls, and citizens in general. We worked closely with the city’s stakeholders including Department of Transportation, bicycle groups, and schools to promote collective change in attitudes towards bicycle, also advocacy for improvements in infrastructure and regulations support for cycling in the city.
Kota Kita proposed three programs to support the ecosystem for biking in Solo, especially proposing for programs concerning for women cyclists’ needs. Those programs were approved and will be implemented in 2018 by using regional expenditure budget (APBD) Solo City.

This project was started in May - December 2017. Through the bicycle map of Solo, we want to help people finding the best routes to bike based on different indicators such as Level of Services (LoS), Accident-prone locations, shade, slope, lighting.

We also produced Bicycle Map for tourism purposes, promoting three different routes; historical route, craft and batik route and park route. Pending joint publication with Tourism Board of Solo City in 2018.

ICAIOS (International Centre for Aceh and Indian Ocean Studies)

This year, we also conducted study in Banda Aceh, a capital city of Aceh, that is known to be the one and only province in Indonesia that observes Sharia Law. The study aims to compare different attitudes and behavior, and if there's any, challenges for women bicycling in different political, social, cultural contexts. The study is still ongoing but the results collected as per June 2017 showed that there are no significant differences in attitudes towards different women and bicycle. Bicycle is widely accepted in the context of Banda Aceh, with higher expectations on modest dress code.

ADVOCACY
2017’S ADVOCACY INITIATIVES:

- Promoting the Right to the City as an Alternative Framework to Realize Practical Solution

- Organizing the 5th Urban Social Forum as a Way of Promoting Social Justice in Cities
PROMOTING THE RIGHT TO THE CITY AS AN ALTERNATIVE FRAMEWORK TO RETHINK CITIES THAT ARE INCLUSIVE AND SOCIALLY JUST

CORRESPONDING GOALS:

PARTNER:
GLOBAL PLATFORM FOR RIGHT TO THE CITY (GPR2C)

Photo by Paulista Surjadi
Since 2015, Kota Kita has been a part of the Global Platform for the Right to the City (GPR2C) an international multi-stakeholder network that has been working towards raising awareness on the Right to the City worldwide. Kota Kita has been engaged in local, national, and international activities and we aim to promote the Right to the City concept as a new paradigm for urban development at the Indonesian and Southeast Asian levels. The idea is to showcase and advocate for the Right to the City as an umbrella concept that could bring together multiple movements in the urban scene, strengthening the civil society participation in producing and shaping inclusive and democratic cities. Kota Kita intends on raising general awareness around the principles and ideas of the concept, also reaching out to a broader, general audience.
2017 ACTIVITIES:

Kota Kita has been engaged in international, national, local activities related to the Right to the City. In these engagements, we have been in contact and debate with a varied set of audiences, from experienced practitioners and academicians to a general public. The concept itself, as well as its implication and possible implementation and advocacy efforts were discussed in these different moments.

OBJECTIVES

• To create a democratic and open space for civil society organizations and members to meet and discuss the ways we can improve cities in Indonesia

• To build a network of urban civil society organizations that focuses on civic innovations and solutions— with potentials for policy advocacy

The Urban Social Forum is an annual event led by Kota Kita, together with civil society organizations from around Indonesia, to create a democratic, open and free space for urban civil society members to meet and discuss different ways to improve our cities, reaffirming that ‘Another City is Possible’.

At the center of a discussion held to open the 5th Urban Social Forum was the big of question of ‘who owns the city?’ and how member of communities could be involved in collaborative actions and active participation in the making of socially just, inclusive, and sustainable Indonesian cities. The plenary session attempted to answer the question by introducing perspectives from Gugun Muhammad, Environmental and Urban Poor Activist from Jakarta, Hera Diani from feminist publication, Magdalene.co, Savic Ali of Gusdurian and advocate for pluralism, and Somsook Boonyabancha of Asian Coalition of Housing Rights, Thailand. They gave a snapshot of the complexities and challenges in inclusive city planning and development, contributed by gender and class division, also political and ideological ones. However, all agree that we should be working on a paradigm shift from our current development agenda, that champions mere infrastructure and physical growth for economic competitiveness, to return to collective power of communities and their collaboration.
